## DETAILED ACTION

### *Claim Objections*

1. Claim 8 is objected to because of the following informalities: “at least along one longitudinal edge, but along both longitudinal edges” as recited in lines 4-5 is somewhat confusing; “said cutouts staring at the longitudinal edge and are accordingly open-edged” as recited in lines 6-7 is also incoherent. Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by German patent 508,130.

DE 508,130 shows, in Figs. 1 and 2, a device for distributing lubricants in grooved rails, particularly for railborne traffic, comprising;

an elongated plate which can be arranged in the groove of the rail and which is provided with cutouts at least along one longitudinal edge;

the cutouts starting at the longitudinal edge and are accordingly open-edged, the lubricant being supplied to these cutouts, and wherein the open-edged cutouts of the plate are covered by a cover plate which is constructed so as to be elastic at least on the covering area.

Art Unit: 3682

*Allowable Subject Matter*

4. Claims 9-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

*Conclusion*

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Rail having grooves for distributing lubricants.
